SUMMARY

Computer Engineering student at Ahram Canadian University with strong foundations in Computer Science and Artificial Intelligence. Founder and Lead of the AIOT student community, passionate about building smart, practical AI-driven solutions and Business Intelligence dashboards. Certified in AI, Software Engineering, and Programming by IBM, Coursera, and Johns Hopkins University.

EDUCATION

Ahram Canadian University

Bachelor of Engineering in Computer Engineering (Fourth-Year Student)

Giza, Egypt

July 2022 – Present

EXPERIENCE

Founder & Lead

AIOT Student Community – ACU

Giza, Egypt

2025 – Present

- Founded and leading a student community focused on Artificial Intelligence and IoT.
- Organized technical workshops and AI sessions for engineering students.
- Mentored students in building practical AI and embedded systems projects.
- Managed team coordination, event planning, and technical content development.

Data Analysis Trainee

National Telecommunication Institute (NTI) – (Certificate Pending)

Cairo, Egypt

2025

- Completed intensive training in Data Analysis and business intelligence.
- Worked with Python (Pandas, Scikit-learn), SQL, and Power BI.
- Performed data cleaning, preprocessing, visualization, and dashboard creation.

Software Engineer

MVD

Giza, Egypt

Jan 2024 – Present

- Supported code review, system integration, and validation processes.
- Developed well-tested and scalable code for software projects.
- Collaborated with QA teams to investigate bugs and write test cases.
- Integrated third-party applications to enhance system performance.

Electric Field Engineering Intern

Egypro - Wadi Degla Trading & Engineering Projects

Cairo, Egypt

July 2024 – August 2024

- Assisted in technical fieldwork and improved project coordination skills.

Intern

Xiaomi

Giza, Egypt

September 2025 – October 2025

- Gained practical experience in software and hardware integration.

AI Intern

Information Technology Institute (ITI) with NVIDIA

Cairo, Egypt

September 2025

- Trained on AI frameworks and accelerated computing using NVIDIA technologies.

PROJECTS

Music Data Dashboard

Business Intelligence Project

Power BI, SQL, Data Analysis

- Developed an interactive dashboard analyzing music datasets to extract key trends and insights.
- Performed data cleaning, processing, and visual modeling using Power BI to facilitate decision-making.

CERTIFICATIONS

- [Generative AI & Artificial Intelligence \(IBM\)](#)
- [The Arduino Platform and C Programming \(Coursera\)](#)
- [Java Certification](#)
- [Leaders Preparation Certificate](#)
- Introduction to Software Engineering (Johns Hopkins University)

SKILLS

- **Languages:** C, C++, Python, Arduino C, HTML, SQL
- **Data:** Data Analysis, Data Cleaning, Data Visualization
- **Tools:** Git, Power BI, Visual Studio, WordPress, Notion
- **Other:** System Integration, Configuration Management

LANGUAGES

- Arabic: Native
- English: B2
